	Environmental Management System (EMS) UNI EN ISO 14001:2015	Rev.2 Data: 12/06/2026
	Environmental Policy	

S.I.I.T. S.r.l., a company specializing in the development, manufacturing and contract packaging of food supplements and medical devices, recognizes the fundamental importance of managing the environmental impact of its activities and contributing to a more sustainable economy.
To this end, the company has established its Environmental Policy as a reference framework for everyone working on its behalf and considers it a priority in the management of its operations.
Management is committed to integrating environmental considerations into the company's decision-making and operational processes, with the aim of continuously improving its environmental performance.
This document incorporates the latest amendments to the ISO 14001 standard, with particular emphasis on climate change awareness and action, with the aim of strengthening the organisation's ability to adapt to climate-related risks.

In this context, S.I.I.T. S.r.l. is committed to:

- Acting responsibly and in compliance with applicable environmental legislation.
- Preventing and reducing atmospheric emissions, wastewater discharges and waste generated by manufacturing and laboratory activities.
- Managing resources responsibly while protecting the environment, ecosystems and biodiversity.
- Continuously monitoring regulatory developments to ensure compliance across all its activities.
- Maintaining an **Environmental Management System** in accordance with **UNI EN ISO 14001:2015**, ensuring that it is an integral part of the company's management processes, allocating appropriate resources and reviewing it regularly and systematically.
- Minimising significant environmental impacts through the consistent and systematic implementation of appropriate procedures.
- Eliminating waste and reducing the consumption of natural resources, including raw materials, water and energy.
- Encouraging suppliers to demonstrate a tangible commitment to environmental issues.
- Regularly reviewing environmental performance and the effectiveness of the Environmental Management System in accordance with ISO 14001 requirements.
- Raising awareness among employees of the contribution everyone can make to promoting environmental responsibility.
- Periodically reviewing the Environmental Policy to ensure that it remains relevant and appropriate to the organisation.
- Pursuing the continuous improvement of environmental performance.

The Environmental Management System is shared and approved by the Company's Management.
